Stainless steel hub and stem European Standard No. 1.4305 (American standard 303 series) Stepped retractable handles are noted for their modern design, and the stepped shape provides the operator with a better grip.

Retractable handles are suitable when the handle must be withdrawn during automatic operations. The handle is pulled out of its taper seating in the direction of the arrow and then tilted. A compression spring locks the handle in both end positions.

A positive lock is achieved in the operating position by way of a tapered seating.

Maximum heat resistance of nylon plastic hand piece: 90°C (194°F).
